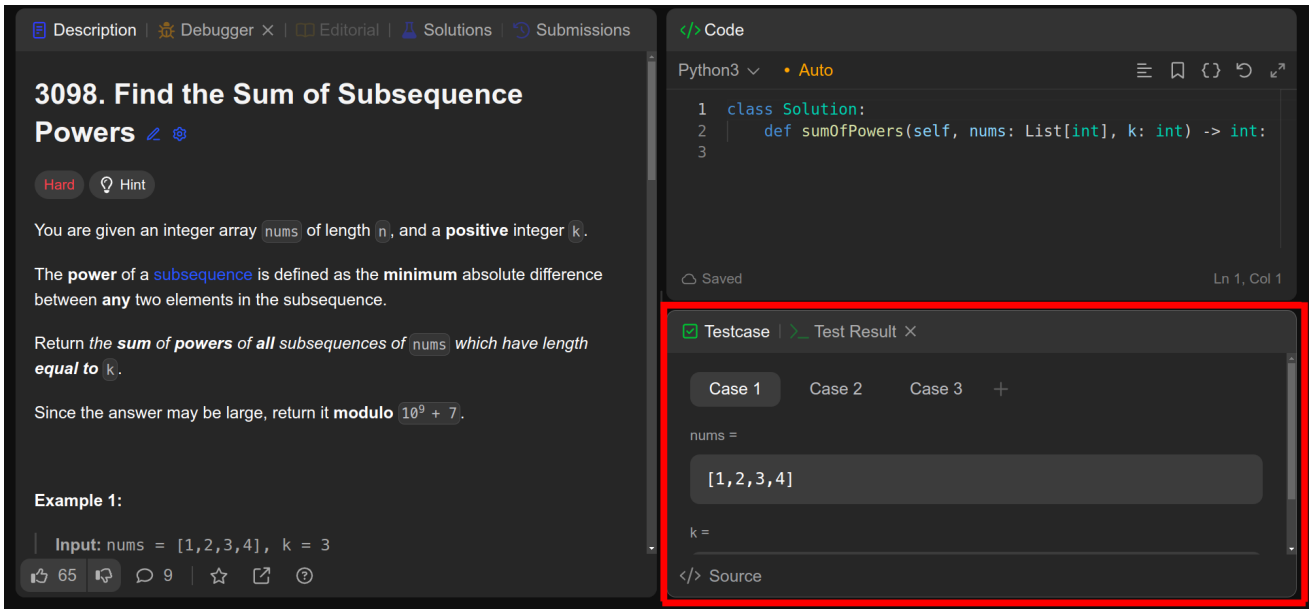
Saranathan College of Engineering, Trichy-12

Department of IT

LeetCode is a website where people can practice solving coding problems and prepare for technical interviews. There are over 1400 problems on LeetCode. They range in difficulty from Easy to Medium to Hard. The coding environment provided on LeetCode supports C++, C#, C, Java, JavaScript, Python and Ruby. We motivated the students to attend the contest in leetcode online platform.


It is an innovative way to motivate the students to practice coding and submit problem solutions posted online.
