

SARANATHAN COLLEGE OF ENGINEERING
DEPARTMENT OF MECHANICAL ENGINEERING

Guest Lecture on “Recent developments in Automobile Engineering”

The Department of Mechanical Engineering organized a guest lecture on “Recent developments in Automobile Engineering” for III year ‘A’ Mechanical Engineering students on 7th February 2017. Prof.T.Venkatesan, Director, Fifth Wheel Drive, Trichy, was the invited guest. He detailed the basics of Automobile Engineering with real time examples and videos. He also addressed the current state of the art in this technology. During the course of his lecture, he demonstrated the construction and working of the differential unit in the transmission system of an automobile displayed in the seminar hall. He explained the transformation of early stage of automobile inventions to the latest technology in collaboration with the Information and Technology. The students were very much enlightened by his lively and interactive lecture. A hands-on session for students was organized after the lecture program, for the benefit of the students.
